

Office Eden Design, Genk, Belgium

Handmade in Belgium

Since 2007 we combine the imagination of the designers with our research and development, allowing in only a few years to create a range of products with timeless design, distributed from Genk, Belgium to over 50 countries world-wide.

Innovation & Quality

Artificial light is as important as sunlight, which is why Eden Design invests all its knowhow in exclusive and innovative lighting products that comply with international quality standards.

Personal project

Most of the lighting products can be customized, allowing to obtain an exclusive product that is adapted to your projects. You will thus be able to create an atmosphere, accentuate objects (clothes, paintings, ...) as you wish.

The power of this light source lies in its slenderness and unobtrusiveness; the simplicity of the fixtures' design makes that it can be used anywhere. An innovative and state-of-the-art magnet and contact system makes that a wide variety of led-fixtures can be easily inserted or moved.

The led-fixtures are similar in style yet each one of them has its own character and lighting quality.

Eden Design was the first to introduce this magnet system on the market. First presentation was in **2010** on the designfair Interieur Kortrijk, Belgium.

This collection won several awards, such as:

- The Best of the Best Red Dot Award (2011)
- Design Plus powered by Light & Building (2012)
- Henri van de Velde Label (2010)

Snap system for turn soraa

Soraa has developed an optical system that is optimized around its breakthrough GaN-on-GaN™ LED technology. The result is directional light with near perfect light distribution, exquisitely uniform color and smooth, artifact free transitions. The optical light engines deliver intensity normally associated with substantially larger diameter sources. Beam angles range from narrow spot to flood and can be combined with the SNAP System accessories to change light distribution and light color on site.

The SNAP SYSTEM's self-centering magnetic interconnect system makes using accessories completely user friendly. Simply attached the SNAP SYSTEM accessory directly to the led engine, the magnetic force from both the accessory and lamp will securely attached to one another and center itself. The accessories can be stacked in combination. For example, a beam spreader can be used in combination with CCT shifter.

Use in any application where reducing the number of beam angle SKUs is required. Provides maximum flexibility up to the time of installation.

- TURN.SO.17** SNAP beam spreader 17°
- TURN.SO.25** SNAP beam spreader 25°
- TURN.SO.36** SNAP beam spreader 36°
- TURN.SO.60** SNAP beam spreader 60°

Use in wall washes and illuminating asymmetric objects. Reduces required number of light fixtures and spill.

- TURN.SO.1025** SNAP linear 10°x 25°
- TURN.SO.1036** SNAP linear 10°x 36°
- TURN.SO.1060** SNAP linear 10°x 60°

Designed with two lenses the AIM snap bends the beam from 0 degree to maximum deflection angle of 20 degrees, while maintaining uniform and consistent color and shape.

- TURN.SO.AIM** deflection angle of 20°

Eliminates high angle glare, making light beams disappear in downlight applications.

- TURN.SO.LOUVRE** SNAP anti-glare louvre

Use in hospitality and restaurant applications to simulate warm dimming. Create custom colors for festive occasions or brand identity.

- TURN.SO.CS.1/4** SNAP color shift small
- TURN.SO.CS.1/2** SNAP color shift medium
- TURN.SO.CS.3/4** SNAP color shift large

°hide-out NEW

Hide-out is a 24 Vdc recessed track system which offers a great flexibility in terms of moving around the LED lighting fixtures 'nook' and 'tag' since they don't have a power cable. This means that any person can move the lighting fixtures since there is no need of connecting wires. The lighting fixtures have a hinge system which makes that you can hide them inside the ceiling or pull them out. Optionally available with indirect ambient lighting. Hide-out is available in black and white.

°ledline

Continuous lines of light, without limits.

Each led module can be cut every 8 cm, this gives architects and lighting designers a lot of flexibility.

Led line has a very good efficiency. A high-tech diffuser was implemented to block as little light as possible and still give an opal look.

Led line can be installed surface mounted, recessed and pendant. It is available in two control options: DALI & 1-10V. Available in anodized aluminum, black or white.

°oh!led **NEW**

Raising lighting to a new level. In the past OLED has mainly been used for decorative and ambient lighting. OLED stands for Organic LED and produces a natural glare-free light. This innovative OLED luminaire has a lumen output of 300lm from a single 12,7 cm sheet, which makes it the brightest commercially available OLED in the world and makes it perfectly suitable for functional lighting. This sleek panel, mainly made out of aluminium and glass is less than 5mm thick!

°sphere

Belgian architect Bart Lens needed a large lamp that would create an encircling sphere of light above the conference table in their office, and so began the search. After a long and fruitless quest, he finally decided to design his own mega-light with the “sphere” of a dome. The result has been likened to a “Calimero” dome, a giant bell, a half moon.... Everybody seems to have a different name for it.

°led on fire

In a T-restaurant in Peking (China), Mr. Lens was eating at an immense mirror table with candles hanging above him. It was cozy, romantic, but also streamlined and modern. For another design we already experimented with hanging led-lights suspended from low charged wires. We marveled at the vision of a completely accidental, out-of-the box combination of a led underneath a burning candle. The effect of the translucent candle-emulsion was also heartwarming. The apparition of a led fixture, burning, not at all kitschy, with light shimmering through the material structure is imprinted in our minds. “The led is on fire”, we tried it out.

Design by Bart Lens

°fool moon

People have always been fascinated by the light of a perfect circle. The returning full moon and the natural phenomena ascribed to it (higher childbirth percentage, fertility, transformation from human to animal, etc.), the archetypical form of a UFO, the shape of a gong, the sun... are but a few striking examples. Despite its shape of a full circle ('full moon'), the lamp can be used in several positions: horizontally, diagonally, obliquely or vertically ('fool moon'). Thanks to its large dimensions, the lamp is easily recognisable and has the possibility of demarcating or creating spaces. The lamp also has a highly symbolic value due to its imposed abstraction.

°LEDit-bi

LEDit-Bi is a wall lamp shining in two directions (Bi-directional). The shade is built up out of two materials (Bi-material cover). The aluminium profile holds a foil that in its material and color can be adapted to your interior and style. As well with the light as with the design of the shade, an accent is set. The here used light sources are standard available bulbs. Any replacement is easy and assured.

°XXXL(amp)

Perhaps symptomatic of an architect's mindset, the lamps and objects are becoming increasingly 'space defining'. The xxxl(amp) is essentially a flattened dome, inspired by the shape of a Chinese lantern. The twelve-segment construction makes the connection with the lantern, but a pumpkin is perhaps the first association that comes to mind, while the suspension system recalls an upside-down hot-air balloon. If the ceiling is high, but not overly high, the lamp can be hung at about 1.50m. As befits any impressive space, you'll want to enter with a slight bow. Once seated at the dining or conference table, you'll still retain a sense of the surroundings beyond the boundary. Hanging a half or a quarter xxxl(amp) in a mirrored room creates an impression of spacious rooms full of giant lanterns.

included: 4 m / 155 in cables & 12 suspension elements, lighting element with 2 m / 78 in suspension bar

°diabolo

Two hemispheres, a couple or twins, of which one of them is lighted by LED and rotates $190^\circ / 360^\circ$ on its axis. Single or in line, it evokes images of a solar eclipse, a chesterfield chair or a diabolo toy. Available as table-lamp, wall lamp or ceiling lamp and in several colors.

°xl(amp)

This lamp was initially designed to mark the edge of a fair booth and simultaneously present images on the inside. The lamp shade foil is foldable. This allows for easy transport and makes it possible to cover the lamp with a photo film. The lamp, by virtue of its size, defines its own space.

°i-light

i-light is a thin, hanging tubular light fixture with an incorporated LED-light. The small loose-hanging chrome-plated sphere creates an unusual light and shadow play. The lamp can be used as trim lights, hanging lights, or – when several are combined – as a chandelier. When the tubes are hung low, the reflection of the chrome-plated rods produces a ‘starry sky effect’.

Design by Bart Lens

°tablecloth

A synthetic drape forms a covered table and at the same time a table structure. Entirely resembling a starched hail blank tablecloth, but manufactured in self-supporting blank plastic. Optionally, rechargeable light modules are available so that the tables can be placed wireless everywhere. After seven hours the tables announce the end of the party. Time to recharge!

°SO1

The design of this large-scaled lamp is pure and back to basic, therefore the SO1 really leaves nobody untouched. Made in PE (polyethylene) by rotational moulding, this large lamp (height 1m40) can be used inside as well as outside.

Built-in into ceiling or wall, lying on the floor or just hanging in the room.

Outside used as street light (with a post) or as lighting accent in the garden.

The use of this lighting-object will give an extra accent to rooms, spaces, streets and public parks.

Design by Sara Olaerts

°poirot

Curled as a curly moustache, is the corpus of the light element, called “Poirot”, with whom this moustache is associated the best. Available as hanging lamp or two types of wall lamp and in several colors. With a lumen output of over 2500lm for the wall version and over 7000lm for the hanging version, the Poirot is perfect for situations where a lot of light is required.

°de light ful

°de light ful is a hanging tubular light fixture with integrated LED light. With a light source on top and bottom, you can create your own atmosphere. The use of this lighting-object will give an extra dimension to your room. You can choose for a version with solid colors or for a version with dynamic colors controllable by DMX. The RGBW LEDs give you the opportunity to choose any desired color.
